## §51.1533

- (4) When an indentation exceeds three-sixteenths inch in diameter;
  - (c) Growth cracks:
  - When not healed;
- (2) When more than one in number;
- (3) When more than one-eighth inch in depth;
- (4) When more than three-eighths inch in length if within the stem cavity; or,
- (5) When more than one-fourth inch in length if outside of the stem cavity;
- (d) Split pit when causing any unhealed crack, or when healed and aggregating more than one-fourth inch in length, or when affecting the shape to the extent that the fruit is not well formed;
- (e) Scab or bacterial spot when cracked, or when the aggregate area exceeds that of a circle one-fourth inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the aggregate area exceeds that of a circle three-eighths inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size:
- (f) Drought spots or external gum spots which have an aggregate area exceeding that of a circle one-fourth inch in diameter;
- (g) Scale or scale marks when the aggregate area exceeds that of a circle one-fourth inch in diameter:
- (h) Scars, including those caused by hail, when the surface of the fruit is depressed more than one-sixteenth inch, or when exceeding any of the following aggregate areas, or a combination of two or more types of scars the seriousness of which exceeds the maximum allowed for any one type:
- (1) Dark or rough scars when the area exceeds that of a circle one-fourth inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle three-eighths inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size;
- (2) Fairly light colored, fairly smooth scars when, in the case of Italian type prunes, the area exceeds that of a circle one-half inch in diameter; or when, in the case of other types of plums, the area exceeds that of a circle one-half inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle

five-eighths inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size.

- (3) Light colored, smooth scars when, in the case of Italian type prunes, the area exceeds one-twelfth of the fruit surface; or when, in the case of other types of plums, the area exceeds that of a circle three-fourths inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle seven-eighths inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size;
- (4) Twig or limb scratches which are not well healed or which have an aggregate length of more than one-half inch; and
- (i) Russeting which exceeds any of the following aggregate areas of any one type of russeting, or a combination of two or more types of russeting the seriousness of which exceeds the maximum allowed for any one type:
- (1) Rough russeting when the area exceeds that of a circle one-fourth inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle one-half inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size;
- (2) Slightly rough russeting when, in the case of Italian type prunes, the area exceeds one-twelfth of the fruit surface; or when, in the case of other types of plums, the area exceeds that of a circle five-eighths inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle three-fourths inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size;
- (3) Fairly smooth or smooth russeting when, in the case of Italian type prunes, the area exceeds one-twelfth of the fruit surface; or when, in the case of other types of plums the area exceeds that of a circle three-fourths inch in diameter on a fruit 2 inches in diameter or 4x4 size, or smaller; or when the area exceeds that of a circle 1 inch in diameter on a fruit larger than 2 inches in diameter or 4x4 size.

## §51.1533 Well colored.

Well colored, as applied to Italian type prunes, means that 95 percent of the surface of the prune is purple color.
